- *Jacob Fontenot*, Chapter Secretary
- *Cary Becker*, Facility Specific Items, Safety Directions
- Outstanding Business Items
- 8:45 -9:45 am** **Educational Session, New & Associates, Indoor Air Quality –Healthcare Environment, ASHRE 62**
John New: New & Associates: John has a BS and MS in Mechanical Engineering. He has been in the HVAC supply and service business for over 40 years. He recommends engineered solutions for hospitals, universities, and industrial customers. John will be discussing dehumidification in hospital environments coupled with bipolar ionization (Global Plasma Solutions) for IAG Improvement. Munters Corporation is the largest manufacturer of dehumidification equipment in the world. They offer energy saving options for critical environments. Coupled with bipolar ionization the hospitals maintain premium indoor air quality. This is done through the elimination of mold, mildew, pathogens and bacteria.
- 9:45 - 10:00** **Break**
- 10:00 – 12 Noon** **Educational Session, 2014 FGI Guidelines and the 2015 NFPA Life Safety Code Louisiana State Fire Marshal’s Office**
Lawrence “Joe” Delaune, Jr., Architect, CBO: Mr. Delaune is the Chief Architect for the Louisiana State Fire Marshal and the Administrator of the Engineering Section of the office. This Section consists of approximately 40 professionals who administer the codes, rules and laws that apply to all new and renovated commercial structures in the state, and who provide training and consultation to licensed architects, engineers, contractors, and commercial building owners. Mr. Delaune also initiates special projects such as Information Technology advancements, and assists with legislative changes that enhance life safety and protection of property. Delaune has been a licensed architect for 22 years and a certified building official for 10 years. After many years in the construction industry, and after practicing architecture with private firms in the states of Florida and Louisiana, Mr. Delaune has devoted his career to public safety and fire prevention for the State of Louisiana. Mr. Delaune has been with the Louisiana Office of State Fire Marshal for over 18 years.
- 12:00 - 12:30 pm** **Lunch, Provided by: Siemens**
- 12:30 – 12:45 pm** **Society News, Comments, Q&A and Door Prizes**
Tommy Gautreau, President
- 12:45 – 1:45 pm** **Education Session, Proper Design for Steam Sterilizers and Trap Selections, Spirax Sarco Steam Specialties**
Max George, Max Energy: Max joined Spirax Sarco in 1978 and established Max Energy in 2004 and currently represents Spirax Sarco Steam Specialties. Max works with many hospitals, refineries, chemical plants, and universities. Max has over 35 years of steam system experience with over 20,000 hours of plant site surveys, audits, assessments, capital projects, and optimization projects along with trouble shooting and technical training.
- 1:45 - 2:00 pm** **Break**
- 2:00 - 3:00 pm** **Educational Session: Energy Savings through Commissioning**
John Thompson: John Thompson is the Principal and Founder of Thompson Building Energy Solutions and has been in the HVAC field since 1992 in the areas of building commissioning, energy conservation consulting, building audits, building controls and mechanical design. Thompson Building Energy Solutions LLC employs a staff of 7 individuals dedicated to providing the highest quality of building commissioning, design and energy consulting services to a local, regional client base.
- 3:00 – 3:15** **Adjournment and closing comments**
Thomas Gautreau, LASHFM President

Please visit our website @ www.lashfm.org to register for this event. There you will also find directions to the host facility and other information about this meeting. Our society continues to grow and has outgrown the available meeting space at some of our facilities. Therefore, we will require that everyone register for this event and all future events. We must do this so that we can ensure that we have adequate meeting space and more importantly meals and beverages. Your participation and cooperation is appreciated and suggestions are welcome.
